

NORTHBRIDGE SOLUTIONS: GETTING IT DONE

Northbridge Solutions is a full service IT consulting company that specializes in providing complete IT support for small and medium-sized businesses. Hiring Northbridge is like having your own expert IT department for a fraction of the cost. Our staff has many years of experience in all aspects of IT support and project management.

Accountability

Northbridge Solutions provides our customers with an account manager who is responsible for your network. It's like having your own IT manager and professional staff.

Expertise

Northbridge Solutions is run and staffed by expert technicians. We do not employ sales people or anyone else who would get between our customers and the technical expertise you need.

Who We Are

Northbridge Solutions is an IT services company dedicated to the highest standard of service with the edge of a personal touch. Throughout their years of experience in the field, the founders of Northbridge Solutions witnessed too many companies spending too much time worrying about their IT needs while paying too much money for low-quality IT services. We believe there is a better way for small to medium sized businesses to manage their IT systems.

At Northbridge Solutions, we believe our customers should be able to focus on their principal business needs and clients, while we manage their systems at a fraction of standard cost.

Experience Counts

Northbridge Solutions was founded by two partners who have over 10 years of IT experience. The founders have each managed corporate networks as large as 1,500 computers, 30 servers, and numerous other devices. They have worked closely with technical partners such as: Cisco, Dell, IBM and Microsoft as well as many others. Their experience includes, but is not limited to database integration, disaster recovery, email management, desktop support, virus protection and remediation and web development.

The founders have a long history in client relationship management, project management and personnel management. They have orchestrated many high level projects in the corporate environment from inception to completion, while managing and coordinating technical teams with various skill sets.

Peace of Mind

Focus on your core business, while we keep your network and your computers running smoothly.
